

**COMPANY PROFILE**

**WORLD'S LEADING AND FINEST SOCKS MAKER**

# **BT NETWORKS PTY LTD \_Australia SOCK MAKERS LTD \_New Zealand**

**We are a family operated business in Australia and New Zealand .  
Manufacturing facility in Auckland, New Zealand, and are proud of  
our 40 year legacy of textile manufacture.**

**Dedicating time to offering unique design through constant  
development of knitting and design techniques that test the limits  
of our machinery.**

**Our advanced sportswear line uses our newly  
developed Fit 5 system that ensures that the sock performs  
at the highest.**

**HERE SINCE 1981**

**We use advanced technology machines (by specialist Busi Giovanni with Rimaglio toe closing technology ) tailored to cater for all foot sizes from babies to big footed adults (5", 4" and 31/2").**

**Our sportswear line uses our newly developed Fit 5 System that includes technologies like, Fibre Stitch Selection, Stay up Technology, Heel Hold System, Multi Loop Technology and Advanced Seamless Technology.**

**FIT 5 SYSTEM**

**Our wide range of socks (Sportswear-Rugby, Golf, Soccer; Farm Work, Gumboot, Hiking, Hunting, Business, Casual, School, Kids, Winter etc.) go through a number of processes;**

- 1. Knitting**
- 2. Toe Linking**
- 3. Boarding**
- 4. Quality Control**
- 5. Packing**

#### ① FIBRE STITCH SELECTION

Being a key ingredient to the overall performance of this sock, special attention has been placed on fibre or stitch application to ensure better performance.

#### ② STAY UP TECHNOLOGY

A perfect fit with no tension is made possible with stitch tension control and a spandex web that wraps around your foot and over the length of the sock.

#### ③ HEAL HOLD SYSTEM

The sock is held in place from the pivot with a well balanced elastic rib selection. This helps to maintain the fit even during rigorous activity.

#### ④ MULTI LOOP TECHNOLOGY

Our new knitting technique of mixing multiple ends or fibre to make multiple loop ends provides your foot with extra stability by allowing it to sink into the padding.

#### ⑤ ADVANCED SEAMLESS TECHNOLOGY

The Seamless toe technology boasts of a high strength flexible seamline that allows the sock to flex with your foot providing a flawless finish.

### DESIGN & TECHNOLOGY

#### FSSP

BASE FOOT MULTI LOOP DENSITY POSITIONS

#### ① ADVANCED SEAMLESS TECHNOLOGY

Our seamless toe flexes with the movement of your foot because of its high strength and none rigidity seam. It also ensures minimum irritation and great comfort.

#### ② TOE STRENGTH

Toe area strength is guaranteed due to increased stitch density.

#### ③ LEFT AND RIGHT

A greater fit is produced by anatomic designed foot.

#### ④ MULTI-LOOP TECHNOLOGY

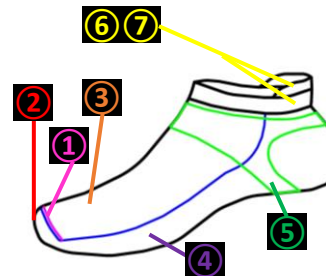

We use a knitting technique to produce multiple loops in padded sections of our products. This lets your foot sink into the padding creating greater stability.

#### ⑤ HEEL HOLD SYSTEM

Using the heel as the anchor, the sock is held in place using the well balanced ribbed section and graduated elastics.

#### ⑥ ⑦ STRETCH TOP

The ribs make it easy to get in and out of the sock and it's even easier with the easy fit tab.

**① FIBRE STITCH SELECTION**

Being a key ingredient to the overall performance of this sock, special attention has been placed on fibre or stitch application to ensure better performance.

**② STAY UP TECHNOLOGY**

A perfect fit with no tension is made possible with stitch tension control and a spandex web that wraps around your foot and over the length of the sock.

**③ HEAL HOLD SYSTEM**

The sock is held in place from the pivot with a well balanced elastic rib selection. This helps to maintain the fit even during rigorous activity.

**④ MULTI LOOP TECHNOLOGY**

Our new knitting technique of mixing multiple ends or fibre to make multiple loop ends provides your foot with extra stability by allowing it to sink into the padding.

**⑤ ADVANCED SEAMLESS TECHNOLOGY**

The Seamless toe technology boasts of a high strength flexible seamline that allows the stitch to flex with your foot providing a flawless finish.

**DESIGN & TECHNOLOGY**

**FSSP**

BASE FOOT MULTI LOOP DENSITY POSITIONS

**① ADVANCED SEAMLESS TECHNOLOGY**

Our seamless toe flexes with the movement of your foot because of its high strength and none rigidity seam. It also ensures minimum irritation and great comfort.

**② TOE STRENGTH**

Toe area strength is guaranteed due to increased stitch density.

**③ LEFT AND RIGHT**

A greater fit is produced by anatomic designed foot.

**④ MULTI-LOOP TECHNOLOGY**

We use a knitting technique to produce multiple loops in padded sections of our products. This lets your foot sink into the padding creating greater stability.

**⑤ HEEL HOLD SYSTEM**

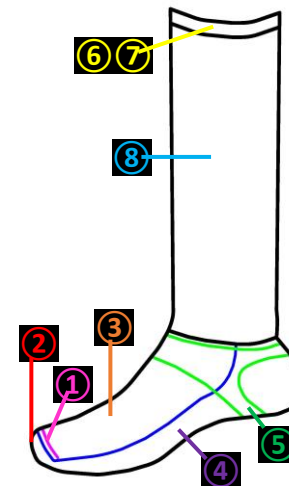

Using the heel as the anchor, the sock is held in place using the well balanced ribbed section and graduated elastics.

**⑥ ⑦ STRETCH TOP**

The ribs make it easy to get in and out of the sock and it's even easier with the easy fit tab.

**⑧ STAY UP TECHNOLOGY**

Ensuring that the product stays in position without constraining the leg

**'IN THE SPORT OF TENNIS, THE FULL RANGE-ON MOTION IS THRUST UPON THE FOOT. WE APPROACHED THIS TASK BY INCREASING THE MULTI-LOOP TECHNOLOGY TO WRAP THE SIDES IN ORDER TO DECREASE COURT COVERAGE IMPACT. THIS ALSO HELPS TO COMBAT FOOT FATIGUE AND MINIMISE IRRITATION THUS HELPING YOU TO FOCUS ON THE GAME'.**

Using the heel as the anchor, the sock is held in place using a well balanced ribbed section and graduated elastics.

#### ⑥⑦ STRETCH TOP

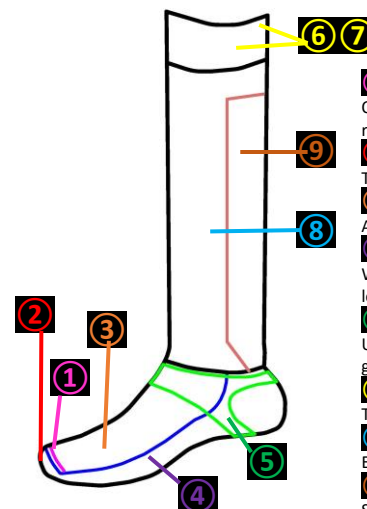

The ribs make it easy to get in and out of the sock and it's even easier with the easy fit tab.

#### ⑧ STAY UP TECHNOLOGY

Ensuring that the product stays in position without constraining the leg

#### ⑨ RELIEF PADDING

Structured padding to benefit the shin - a stress point

| SIZE | NZ    | EURO  | US        | MATERIAL      | WEIGHT       |

IN 16 COLOURS NOT  
SHOWN)

#### ① FIBRE STITCH SELECTION

Being a key ingredient to the overall performance of this sock, special attention has been placed on fibre or stitch application to ensure better performance.

#### ② STAY UP TECHNOLOGY

A perfect fit with no tension is made possible with stitch tension control and a spandex web that wraps around your foot and over the length of the sock.

#### ③ HEAL HOLD SYSTEM

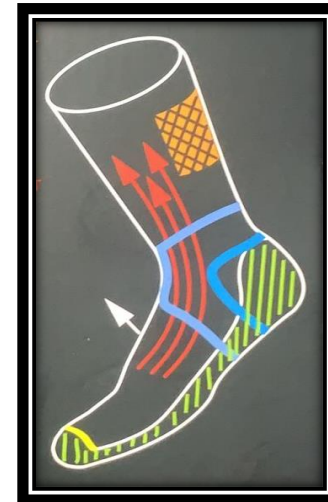

The sock is held in place from the pivot with a well balanced elastic rib selection. This helps to maintain the fit even during rigorous activity.

#### ④ MULTI LOOP TECHNOLOGY

Our new knitting technique of mixing multiple ends or fibre to make multiple loop ends provides your foot with extra stability by allowing it to sink into the padding.

#### ⑤ ADVANCED SEAMLESS TECHNOLOGY

The Seamless toe technology boasts of a high strength flexible seamline that allows the stitch to flex with your foot providing a flawless finish.

### DESIGN & TECHNOLOGY

#### FSSP

BASE FOOT MULTI LOOP DENSITY POSITIONS

#### ① ADVANCED SEAMLESS TECHNOLOGY

Our seamless toe flexes with the movement of your foot because of its high strength and none rigidity seam. It also ensures minimum irritation and great comfort.

#### ② TOE STRENGTH

Toe area strength is guaranteed due to increased stitch density.

#### ③ LEFT AND RIGHT

A greater fit is produced by the anatomic designed foot.

#### ④ MULTI-LOOP TECHNOLOGY

We use a knitting technique to produce multiple loops in padded sections of our products. This lets your foot sink into the padding creating greater stability.

#### ⑤ HEEL HOLD SYSTEM

Using the heel as the anchor, the sock is held in place using a well balanced ribbed section and graduated elastics.

#### ⑥⑦ STRETCH TOP

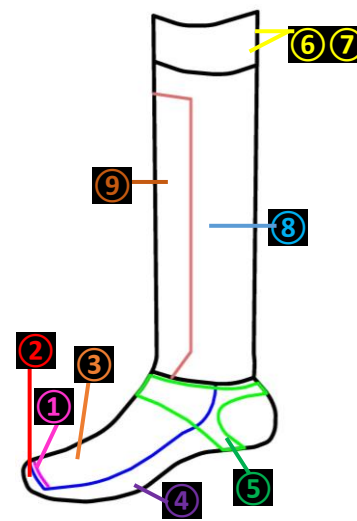

The ribs make it easy to get in and out of the sock and it's even easier with the easy fit tab.

#### ⑧ STAY UP TECHNOLOGY

Ensuring that the product stays in position without constraining the leg

#### ⑨ RELIEF PADDING

Structured padding to benefit the shin - a stress point

'THE SNOWBOARD SOCK USES THE SAME STYLE AS THE SKI SOCK THOUGH IN A SEPARATE FORMATION TO MATCH THE SPORT MOVEMENT OF A SNOWBOARDER. SPECIFIC AREA PRESSURES HAVE BEEN ALTERED TO IMPROVE SNOWBOARDING PERFORMANCE.'
